CALEB N. FOWLER

(541) 300-0063 | calebnfowler@gmail.com | linkedin.com/in/fowler-caleb/

PROFESSIONAL SUMMARY

A full-time student working on completing my Data Science Bachelor's degree with an interest in astrophysical data science. I have a background in computer science and am currently building my data analysis skills through classes and active research.

EDUCATION

Bachelor of Science in Physics Expected 2028
Oregon State University, Corvallis, OR

Bachelor of Science in Data Science Expected 2028
Oregon State University, Corvallis, OR

Associate of Science Oregon Transfer in Computer Science June 2023
Oregon State University, Corvallis, OR

RELEVANT COURSEWORK

Computational Modeling in Physics, Scientific Computing 2, Intro to Statistical Methods, Computer Interfacing & Instrumentation

RELEVANT EXPERIENCE

NANOGrav Collaboration (Oregon State University), Corvallis, OR
June 2026 – Present

Undergraduate Researcher

- Using Bayesian Inference to remove noise from pulsar timing models allowing for a stronger gravitational wave background
- Using No-U-Turn Sampler (NUTS) to find a simulated injection frequency in a simulated data to determine if a method is robust
- Collaborating with a multi-institutional team of researchers to validate data pipelines for the NANOGrav physics working group

Lowes, Salem, OR June 2022 – Present

Customer Service Representative

- Delivered clear and concise communication to team members and customers to solve unexpected problems in a fast-paced environment
- Trained several customer service representatives in procedures, technology, and communication with fellow team members and customers to deliver excellent service
- Maintained stock keeping the product well organized and easily reachable

SKILLS

- Familiarity with GitHub
- Skilled in Python
- Able to work effectively in a fast-paced environment
- Basic understanding of R
